Stockholm, Sweden

## SKILLS HIGHLIGHT

- Design, training, evaluation
  - **AI/ML for biomedicine** Clinical decision support, Variant effect prediction
  - **Deep generative AI models** (VAE, Normalizing flows)
  - **Sequence models** (RNN, HMM, Transformers)
- **Theory and practice** of signal processing, deep learning, optimization
- **Autonomy** and **communication** in interdisciplinary teams combining AI, biology and medicine
- Programming: **Python** (pandas, numpy, sklearn, **torch**+cuda, lightning), PostgreSQL, Rust, Powershell, **GNU/Linux**, git, bash.

## LANGUAGES

- **English** – Fluent
- **French** – Native
- **Swedish** – Basic

# Antoine Honoré, PhD

## TLDR

Researcher with strong experience at the intersection of AI, biology and medicine. I have designed deep generative models for sepsis prediction in preterm infants. My current research focuses on multimodal data integration: protein structures, deep mutational scans and multiple sequence alignments, for variant effect prediction in drug transporter proteins.

## RESEARCH

**Postdoctoral Fellow** | November 2023 –
*Advancing AI in biology research with the department of physiology and pharmacology, Karolinska Institutet*

*Key contributions*

- Design of large scale & novel deep learning architectures for multiple sequence alignment and deep mutational scans data
- Establishing benchmarks in protein variants effect predictors
- Conducting scientific research, student mentoring

## EDUCATION

**Ph.D. Machine Learning and Biomedical Data** | 2023
*KTH Royal Institute of Technology, Stockholm, Sweden*
Thesis: "Perspectives of Deep Learning for Neonatal Sepsis Detection"

*Key outcomes*

- AI/ML models for clinical decision support systems and the analysis of bedside monitoring time series
- Scientific publications (URL: Google Scholar), conference talks/posters (ICASSP, NIPS2017), invited talks (RISE, TU Eindhoven).
- Data integration pipeline for secure and efficient data querying, parsing and analysis from hospital databases (URL: Github, Gitlab)

**Double M.Sc. Electrical Engineering** | 2017
*Grenoble INP-Phelma, Grenoble, France*
*& KTH Royal Institute of Technology*

Majors: Signal Processing, Optimization, Machine learning.

**Classe Préparatoire aux Grandes Ecoles (MPSI – MP)** | 2013
*Lycée Victor Grignard, Cherbourg, France*

Majors: Mathematics and Theoretical Physics.

## SHENANIGANS

- Playing improv, tennis, running
- Reading about all sorts of things
