SKILLS HIGHLIGHT

Machine learning

- Design, training, evaluation of custom deep learning models
- Deep generative AI models (VAE, Normalizing flows)
- Sequence/graph models (RNN, HMM, Transformers, GCN)
- Theory and practice of signal processing, convex optimization

Biomedical AI

- Clinical decision support from **bedside time series**
- Variant effect prediction from **multimodal data**

Soft skills

- Interdisciplinary collaboration in AI, biology and medicine
- Teaching, supervising, mentoring in research environment

Programming

- Python (pandas, numpy, sklearn, **torch+cuda**, lightning),
- PostgreSQL, Rust, Powershell, **GNU/Linux**, git, bash.

LANGUAGES

- English – Fluent
- French – Native
- Swedish – Basic

Antoine Honoré, PhD

TLDR

AI Researcher with strong experience at the intersection of AI, biology and medicine. I have designed deep generative models for sepsis prediction in preterm infants from time series data. My current research focuses on multimodal data integration: protein structures, deep mutational scans and multiple sequence alignments, for variant effect prediction in drug transporter proteins.

RESEARCH

Postdoctoral Fellow | November 2023 –

Advancing AI in biology research with the department of physiology and pharmacology, Karolinska Institutet

Key contributions

- Design of large scale & novel deep learning architectures for multiple sequence alignment and deep mutational scans data
- Establishing benchmarks in protein variants effect predictors
- Conducting scientific research, student mentoring

Associated researcher | May 2023 –

Conducting and performing retrospective clinical studies with the [neonatal transfusion network](#): Oxford, Charité Berlin, Karolinska Institutet

EDUCATION

Ph.D. Machine Learning and Biomedical Data | 2023

KTH Royal Institute of Technology, Stockholm, Sweden

Thesis: [“Perspectives of Deep Learning for Neonatal Sepsis Detection”](#)

Key outcomes

- AI/ML models for clinical decision support systems and the analysis of bedside monitoring time series
- Scientific publications, conference talks/posters (ICASSP, NIPS2017), invited talks (RISE, TU Eindhoven).
- Data integration pipeline for secure and efficient data querying, parsing and analysis from hospital database

Double M.Sc. Electrical Engineering | 2017

Grenoble INP-Phelma, Grenoble, France

& KTH Royal Institute of Technology

Majors: Signal Processing, Optimization, Machine learning.

Classe Préparatoire aux Grandes Ecoles (MPSI – MP) | 2013

Lycée Victor Grignard, Cherbourg, France

Majors: Mathematics and Theoretical Physics.

SHENANIGANS

- Improv theater, tennis, running
- Reading: sociology, economy
